

Nomadesk Small Business Case Study:

Nomadesk Supports Easy, Secure File Sharing for Breslau Insurance Benefits

The Company:

Breslau Insurance Benefits is a small business based out of Scottsdale, Arizona that offers Health Insurance and Employee Benefits.

The Challenge:

Although it is a small business, Breslau Insurance Benefits employees work from different locations and each employee works off of both a laptop and desktop computer.

The company needed a simple, reliable and cost effective system to backup, store and share files with employees and clients. After test driving Nomadesk through a free trial, they knew it was the best fit for their organization.

“Nomadesk is simple, easy to use and affordable,” commented Breslau Insurance Benefits President, Paul Breslau. “We really appreciate the constant stream of product enhancements Nomadesk continues to develop.”

The Solution:

Paul Breslau selected Nomadesk because it provided his company with a straightforward, intuitive, easy to use file sharing solution. Nomadesk allows members of Breslau Insurance Benefits to access, share and collaborate on files from any office quickly and efficiently, while keeping overhead down.

Safety was also a big concern for Breslau Insurance Benefits. Nomadesk boosts security by encrypting files locally and backing them up in the cloud. When the Nomadesk dashboard is closed, fileservers are invisible and protected by 256-bit encryption. When the Nomadesk dashboard is launched, password-protected fileservers appear, ready to be accessed like a local drive. Files are stored on a secure server in the cloud and can only be accessed through a registered Nomadesk dashboard.

With Nomadesk, files are always up-to-date and available to team members whether they are online or offline. Nomadesk automatically synchronizes and updates the files on the cloud server and across the computers of the team members.

“Nomadesk is simple, easy to use and affordable. We really appreciate the constant stream of product enhancements Nomadesk continues to develop.”

“I feel safe using Nomadesk. I know that all our files are secure and encrypted. Knowing that they offer TheftGuard provides an extra sense of security.”

Paul Breslau
President
Breslau Insurance Benefits

“I feel safe using Nomadesk. I know that all our files are secure and encrypted. Knowing that they offer TheftGuard provides an extra sense of security,” Paul Breslau continued.

TheftGuard™ is a feature that Nomadesk offers which allows for remote wiping of files once a computer or mobile device is stolen or misplaced. This security feature brings small businesses comfort; knowing that if something happens to their computer, files will not be lost and business can continue on without missing a beat.

The Result:

Simplifying their file management system allowed for accelerated team productivity and less headaches for the group at Breslau Insurance Benefits. Nomadesk serves as a hub for their employees to access, share, synchronize and safeguard files from any location, whether they are online or offline.

“We’re finding that more and more small businesses are turning to Nomadesk as a simple to use file sharing solution,” stated Darren Trumeter, Nomadesk CEO.

Nomadesk Benefits:

File Security: All files on Nomadesk are automatically backed up to the Nomadesk cloud. Your files are stored with military grade encryption and can be remotely deleted in the event of a lost or stolen computer.

Ad-hoc Sharing: Share files with others who don’t have Nomadesk software, or even an account.

In-depth Sharing: Real-time behind-the-scenes synchronization of files between multiple local drives.

Access Anywhere: Access your files anywhere, from any browser, from your iPhone and through any smartphone.

Flexible Deployment Options: Flexible deployment options include private cloud and integration with existing systems.

Share: Share your files easily with people in or outside your team.

Synchronize: Automatically synchronize all your files across multiple computers.

Support: Real people, unreal support.

Remote and Mobile File Access: Access your files anywhere, from any browser, from your iPhone and through any smartphone.
